

I choose and I pay for the right to listen to satellite radio and I can select the programming that I want to listen to. I no longer have to sit idly by and listen to what non subscription radio's trash that they want me to listen to. I also have the right to be able to listen to traffic and weather channels as a benefit of my subscription and I feel that BIG Radio and all their advertising dollars are trying to influence the FCC into only letting myself and the million other subscription listeners hear only what they want. Please defeat this NAB petition 04-160 and while you are at it, limit the crap that they are allowed to program for everyone to hear.
